PROFESSIONAL EXPERIENCE

Dec 2024 - Mar 2022

Tana, Madagascar

Project Manager for Inventory Management

YHAJA MADAGASCAR

Stock Management Strategies for Feed and Cheese:

- Designed a business application [technology: DOTNETCORE C# WPF] to track product traceability.
- Trained employees to use the developed application.
- Improved the logistics calendar.
- The application manages various types of loans and debts related to transactions

2023 - 2024

Tana, Madagascar

CEO of Nossidea

- Developed the business application for Espace Santika in Madagascar using Symfony, API Platform, and React.

Mar 2022 - Jul 2021

Tana, Madagascar

Project Manager for Entrepreneurship, Bottled Water Sales YHAJA MADAGASCAR

Feasibility Study and Project Execution Preparation :

- Design project plans (objectives, budgets, schedules, resources)
- Define tasks to be completed and coordinate their execution with the team
- Manage the timeline, budget, and risks during project execution

Creation of Potable Water from a Water Source (River) :

- Work with the team to create and wire the electrical control panel for motors
- Build Archimedes screw water decanter machines
- Manage communication between the different stakeholders of the project
- Anticipate risks and manage the budget during project execution

Ongoing Bottling Process :

- Prepare the setup for the conveyor and machines for the bottling process (control panel, TIA PORTAL automation, and power).
- Build a large ultraviolet filter to eliminate particles smaller than one micron.
- Research the best method to treat the water using sodium hydrochloride.

Sept. 2020 - Jan. 2023

Tana, Madagascar

Lausanne, Geneva,

Switzerland

Business Application Developer for Car Rental Aloc-cars, Switzerland

Project Management :

- Migrating the application to a microservice architecture using PHP, JAVA, and DotnetCore C#, Docker, load balancing, DevOps, Minimal API, etc.
- Enhancing user security by implementing JWT authentication [ASP.NET Web API DotnetCore, DAL using the Dapper framework].
- Migrating the front-end to Angular 8.
- Implementing automatic image detection (front view or profile) uploaded by the administrator using Deep Learning and image processing.
- Developing a mobile application (Xamarin) that detects failures when returning rented cars. Deep Learning is developed in Python using the Keras and TensorFlow frameworks.

2019

Tana, Madagascar

Consultant Developer YHAJA MADAGASCAR

Main Responsibilities:

- Develop the business application for cheese stock management, including logistics and IT flows (chain production without financial flows since the company does not export products abroad). The application also manages products based on customer orders.
- Monitor the milk production interface using probes and ARM microcontrollers (STM32).

2014
Douala Cameroun
Quito Ecuador

Business Application Developer for Money Transfer Cash-Xpress, Geneva - Pacoservices, Lausanne

Main Responsibilities :

- Travel to Douala (Cameroon) for 2 months, then Quito for 10 months to develop their business application for money transfer.
- Implement a single user interface with two different databases for the two companies [ASP.NET WebForms for the front end and Data Access Layer using the Dapper framework, MSSQL Server for the back end].
- Fix bugs in the application and resolve internal issues with agents and external issues with payers.
- Develop bots to ensure secure communication between the agency application and the payer application (using SOAP Web Services, Console Application, and scheduling via a Windows Service).

INTERESTS

- **Travel :** Douala (Cameroon), Geneva and Lausanne (Switzerland), Quito (Ecuador).
- **Sports :** Swimming, Football, Chess.
- **Music :** Classical Piano, Jazz Piano.
